- Egypt, Cairo, Badr city.
- 11-01-2000
- Military status: postponed

About me

I am a good learner and passionate about developing my skills and gaining more experience. I am willing to learn new skills and have many existing ones to offer.

Education

- Al-Azhar University**
Faculty of Fundamentals of Religion.
2021-2025

Languages

- Arabic (native).
- English (good).

Projects

Encrypt It

https://github.com/MAlazhariy/encrypt_it

An app that encrypts and decrypts texts by password using unique and strong encryption algorithms. This project helped me developing my skills as whenever I learn something new I practically apply it to the project.

Top skills: Cubit, Localization, Converging to null-safety, Unit testing, Clean code, Responsive UI, Themes, Logic code (Encryption algorithm).

Keefak - social app

https://github.com/MAlazhariy/keefak_social-app

A social media app for online posting and chatting.

Top features: publish, edit and delete posts, comments, likes, a user profile page, edit user profile, login with email/password, login with Google or Facebook, and chatting.

Top skills: Firebase Auth, Facebook Auth, Cloud Firestore, Firestore rules, Firebase Storage, FCM, push notification from API using Dio, Cubit, Model class, Dealing with future data.

Ramadan Mubarak

https://github.com/MAlazhariy/ramadan_mubarak

An application that connects users to pray for each other in Ramadan, with admin control in a separate version.

When I started developing this project, I had no experience with Firebase yet, but I learned to work with it and finished the app in 4 days.

Top skills: Cloud Firestore, Admin control version, Local notification, Azan times using geolocator.

Certificates

- The Complete Flutter & Dart Development Course.
Udemy - May 2022

Technical skills

- | | | |
|---------------------------|--------------|-----------------------|
| - Flutter | - FCM | - Hive & SP & SQflite |
