About me

I am a Flutter developer with one year experience, good learner and passionate about developing my skills. I am willing to learn new skills and have many existing ones to offer.

Education

- Al-Azhar University**
Faculty of Fundamentals of Religion.
2021-2025

Languages

- Arabic (native).
- English (good).

Work Experience

Semicolon

Flutter Developer, August 2022 - Present

- **Solely responsible** for Flutter app development in the company.
- Developed and maintained more than **20 projects** using Flutter for **Android** and **iOS** platforms.
- Communicate with clients to understand **business requirements** and deliver projects accordingly.
- Manage and distribute tasks and time under **high-pressure** situations.
- Uploaded more than 5 apps to the **App Store**.
- The manager can provide a recommendation upon request.

Projects

Social media app - Keefak

https://github.com/MAlazhariy/keefak_social-app

A social media app for posting and editing posts, writing comments and chatting between users with my unique personal code.

Top features: Firebase Auth - FCM - Real-time chatting - Firebase Storage - Login with Google & Facebook.

Encrypt It

https://github.com/MAlazhariy/encrypt_it

An app that encrypts and decrypts texts by password using unique and strong encryption algorithms. This project helped me developing my skills as whenever I learn something new I practically apply it to the project.

Top skills: Cubit - Localization - Converting to null-safety - Unit testing - Themes - Clean code - Responsive UI - Logic code (Encryption algorithm).

Shopping app - Cool Stuff

https://github.com/MAlazhariy/cool_stuff-shop_app

Online shopping app.

Top skills: REST API - Postman - Dio.

Movies App

https://github.com/MAlazhariy/movies_app

Flutter project implemented by Clean Architecture using REST API and Bloc as state management.

Top skills: Clean Architecture - SOILD - Dependency Injection design pattern - Repository dp - Singleton dp concept - Dio - Clean code - Bloc - handling with errors exception.

Ramadan Mubarak

https://github.com/MAlazhary/ramadan_mubarak

An application that connects users to pray for each other in Ramadan, with admin control in a separate version.

When I started developing the project, I had no experience with Firebase yet, but I learned to work with it and finished the app in 4 days.

Top skills: Cloud Firestore - Admin control version - Local notification - Azan times using geolocator - Hijri date.

Problem Solving with Dart

https://github.com/MAlazhary/problem_solving_with_dart

Personal Dart project for Problems that I solved.

Top skills: Problem solving - Analytical thinking - Algorithms.

Certificates

The Complete Flutter & Dart Development Course.

Abdullah Mansour on Udemy - May 2022

Technical skills

- | | | |
|-----------------------|----------------------------|----------------------------|
| - Flutter & Dart | - Firebase | - Hive & SharedPref |
| - OOP | - Firebase Messaging (FCM) | - Git & GitHub |
| - iOS (Flutter) | - App Reskin | - Clean code |
| - App Store | - Dio & http | - SOLID |
| - TestFlight | - Postman | - Unit testing |
| - Android (Flutter) | - Algorithms | - CS50 |
| - Google Play console | - MVC | - Good knowledge of Design |
| - REST API | - BloC & Provider & GetX | Patterns |
