- Egypt, Cairo, Badr city.
- 11-01-2000
- Military status: postponed

About me

I am a good learner and passionate about developing my skills and gaining more experience. I am willing to learn new skills and have many existing ones to offer.

Education

- Al-Azhar University**
Faculty of Fundamentals of Religion.
2021-2025

Languages

- Arabic (native).
- English (good).

Projects

Keefak - Social app

https://github.com/MAlazhary/keefak_social-app

A social media app for online posting and chatting.

Top features: publish, edit and delete posts, comments, likes, a user profile page, edit user profile, login with email/-password, login with Google or Facebook, and chatting.

Top skills: Firebase Auth - Cloud Firestore - Firestore rules - Firebase Storage - FCM - push notification from API using Dio - Cubit.

Encrypt It

https://github.com/MAlazhary/encrypt_it

An app that encrypts and decrypts texts by password using unique and strong encryption algorithms. This project helped me developing my skills as whenever I learn something new I practically apply it to the project.

Top skills: Cubit - Localization - Converting to null-safety - Unit testing - Themes - Clean code - Responsive UI - Logic code (Encryption algorithm).

Cool Stuff - Shop app

https://github.com/MAlazhary/cool_stuff-shop_app

Online shopping app.

Top skills: REST API - Postman - Dio.

Movies App

https://github.com/MAlazhary/movies_app

Flutter project implemented by Clean Architecture using REST API and Bloc as state management.

Top skills: Clean Architecture - SOILD - Dependency Injection design pattern - Repository dp - Singleton dp concept - Dio - Clean code - Bloc - handling with errors exception.

Ramadan Mubarak

https://github.com/MAlazhary/ramadan_mubarak

An application that connects users to pray for each other in Ramadan, with admin control in a separate version.

When I started developing the project, I had no experience with Firebase yet, but I learned to work with it and finished the app in 4 days.

Top skills: Cloud Firestore - Admin control version - Local notification - Azan times using geolocator - Hijri date.

Problem Solving with Dart

https://github.com/MAlazhary/problem_solving_with_dart

Personal Dart project for Problems that I solved.

Top skills: Problem solving - Analytical thinking - Algorithms.

Certificates

The Complete Flutter & Dart Development Course.

Abdullah Mansour on Udemy - May 2022

Technical skills

- | | | |
|----------------------------|---------------------|----------------------------|
| - Flutter | - REST API | - Git & Github |
| - Dart | - Dio | - Google Play console |
| - OOP | - Postman | - Clean code |
| - Firebase Firestore | - Algorithms | - SOLID principles |
| - Firebase Auth. | - MVC & MVVM | - Unit testing |
| - Firebase Storage | - Bloc & Provider | - CS50 |
| - Firebase Messaging (FCM) | - Hive & SQflite | - Good knowledge of design |
| - App Reskin | & SharedPreferences | pattern |

Soft skills

- | | | |
|-----------------------|-------------------------------------|----------------------------|
| - Quick learning | - Attention to detail | - Good knowledge of design |
| - Communications | - Ability to write clean, readable, | principles |
| - Analytical thinking | and reusable code | - Good searching |
